Lab 01

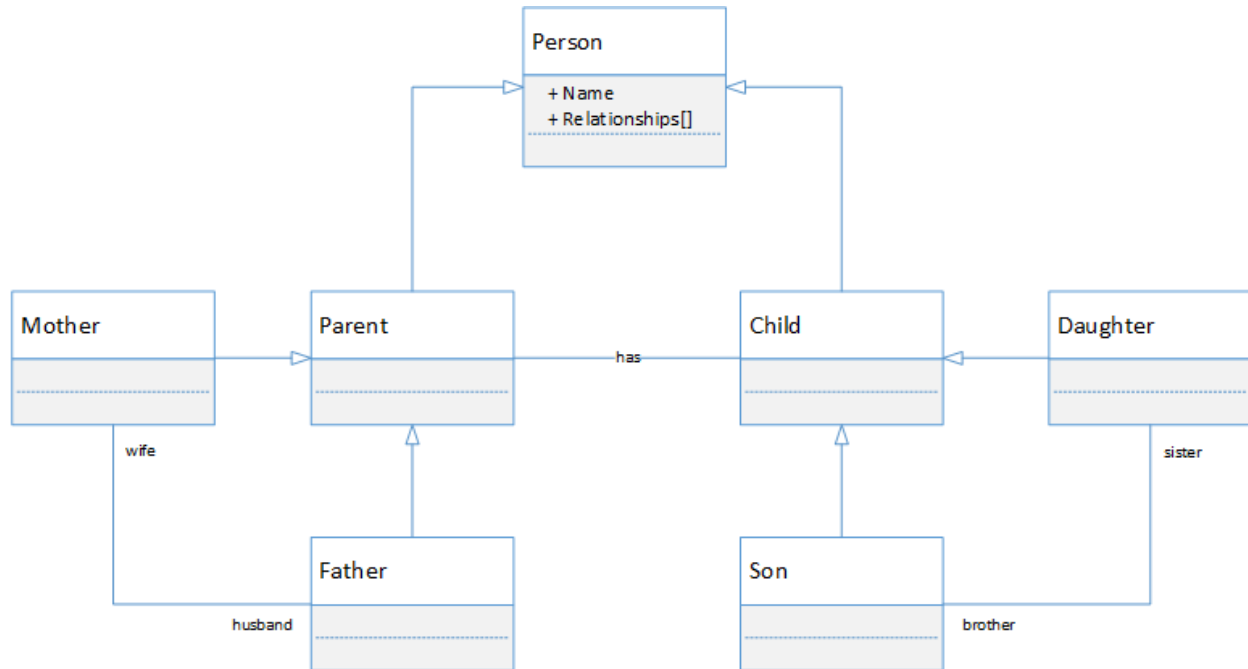

1) Design the Class and ER Diagrams using Visio for the InClass Exercise (Jan. 21) (check the attached file)

Class Diagram:

This is the best way I've found to solve this problem in diagramming. Source:
<http://www.eng.umd.edu/~austin/ence200.d/homework06b-5/family-member1.gif>

Here is my original version:

2) Create a GitHub account and post GitHub ID to the Lab 1 site

The screenshot shows the GitHub profile of J.W. Clark (JamesWClark). The profile includes a profile picture of a man and a woman, the name **J.W. Clark**, and the username **JamesWClark**. The bio mentions **Rockhurst High School** and the join date **Joined on Jan 26, 2013**. The statistics show **0** followers, **0** starred repositories, and **2** following. The **Popular repositories** section lists **Strikethrough**, **EmailExtract**, **test**, **PythonAppEngine**, and **UMKC**, all with 0 stars. The **Repositories contributed to** section lists **henrymp/coursebuilder** with 1 star. The **Your Contributions** section shows a calendar grid with green squares indicating contributions from February to January. The summary at the bottom shows **199 Total** contributions (Jan 25 2013 - Jan 25 2014), a **12 days** longest streak (October 04 - October 15), and **0 days** current streak (Rock - Hard Place).

3) Create a ScrumDo account and define task/plan/delivery for your lab 1 assignment. Also post your ScrumDo ID to the Lab 1 site
